Write a paragraph of eighteen (18) words about:

- 1- Egyptian Plants.
- 2- Germination Process.
- 3- Papyrus.

### Egyptian Plants

Egypt has many kinds of plants. Some plants grow in the desert such as the acacia tree and the tamarisk tree. Other plants grow near rivers and lakes such as the lotus flower and the reeds.

Farmers grow other plants on farms such as  
bean plants and orange trees.

### Germination Process

To grow any plant, we follow some steps. First, we put the seeds in soil. Next, we water the seed. The seed germinates. Then, the roots grow under the soil and the shoot grows above

the soil. We water the plant. After that, the plant has a flower.

Finally, the flowers become fruits.

### Papyrus

Papyrus is an important plant. It's a very special plant. The Ancient Egyptians used papyrus to make paper. They used papyrus to make sandals and baskets, too. Papyrus needs a lot of water, so it grows in the Nile Delta near the river. Papyrus needs warm weather to grow quickly.
